

Radio and Repeater Configuration Compatibility

Standard Configurations

	"Receiver" Radio			"Transmitter" Radio		
	M100	M200	M400	M100	M200	M400
Unidirectional Local Setup/ Knockdown	NO	YES	NO	YES	YES	YES
Unidirectional Remote/Local Setup/Knockdown	NO	YES	NO	YES	YES	YES
Bi-directional Local Setup/ Knockdown	NO	YES	NO	NO	YES	NO
Bi-directional Remote/Local Setup/Knockdown	NO	YES	NO	NO	YES	NO

The M200 series radios include the newer models M208 and M216 or the older models M206 and M214 with either the B308 option for the Local Setup/Knockdown operation or the B833 option for the Remote/Local Setup/Knockdown operation.

Very Limited Capability ("VLC") Configuration

	"Receiver" Radio			"Transmitter" Radio		
	M100	M200	M400	M100	M200	M400
Unidirectional Local Setup/ Knockdown	YES	YES	NO	YES	YES	YES

The "VLC" configuration requires radios with logic boards date coded 8937 and later, which have been shipping since late 1989. The date codes are ink-stamped on the top surface of the PC board.

See "R*I*C*K, Radio and Associated Hardware" section of this manual for further explanation of the "VLC" repeater.
